

Human rights defenders need evidence, law and research to advocate justice and accountability.

We develop tools and strategies that make this **information** accessible.

HURIDOCs supports the community with human rights documentation initiatives to:

CHANGE
PERCEPTIONS

SEEK REDRESS FOR
VICTIMS & SURVIVORS

PURSU
ACCOUNTABILITY

BUILD CAPACITY &
STRENGTHEN THE MOVEMENT

Advise

We partner with human rights groups to **co-create solutions** for their specific **documentation** and **information management** needs.

Design

We develop a free and open-source software tool called **Uwazi** that enables **human rights defenders** to **organise collections** of information.

Exchange

We foster a hub of **guides, frameworks and resources** on how to mobilise information for **advocacy, litigation** or other **human rights work**.

Collaborate

We collaborate with local **activist groups**, national **human rights institutions**, international **NGOs** and coalitions, and many **organisations in between**.

Impact

We help our partners to **achieve greater impact** by making **information** easy to **access, navigate** and **understand**.

Do you need to build and share a collection of human rights information? HURIDOCs would love to help.
